

Assignment 1

Description:

1. Assume that you have the following JavaScript code:

Code -

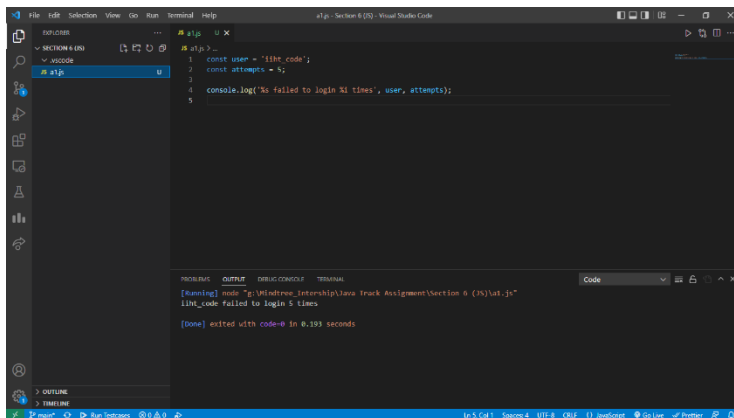

```
const user = 'liht_code';
const attempts = 5;

console.log('%s failed to login %i times', user, attempts);
```

let's format a message containing a string and an integer

Show the output.

- ## 2. Get the console log output?

- 3. Using const can we define a variable in above code or not.**

YES

4. %s and %i are replaced with values of user and attempts. The specifier %s is converted to a iiht_code, while %i is converted to a 5.

Output:

Performance Outcomes:
