Assignment 2

Using static variables, static methods, static blocks, create a java program and display the results. Using "this" word get data and display the results.

```java
package Section2;

public class Assignment2 {
//     Static variables
       static int a = 10;
       static int b;

//     Static block for initialization
       static {
             b = 3;
       }

//     Static method
       static void displaySum() {
             System.out.println("Sum = " + (a+b));
       }

       public void display() {
             System.out.println(this.a + " + " + this.b + " = " + (a+b));
       }

       public static void main(String[] args) {

             displaySum();

             Assignment2 obj1 = new Assignment2();

             obj1.a = 3;
             obj1.b = 4;
             obj1.display();
       }

}
```
