Assignment 2

Using static variables, static methods, static blocks, create a java
program and display the results. Using "this" word get data and
display the results.

i Employee.java ×

```java
1 package Track_Course1;
2 class AllStatic{
3     static String organization;
4     int deptno;
5     String name;
6     String department;
7
8     static {
9         organization = "MINDTREE MINDS";
10     }
11     public static void displayonce(String organization){
12         AllStatic.organization=organization;
13         System.out.println("These guys work in : " + organization);
14     }
15     public void displayWhenObjectiscalled(int deptno,String name, String department){
16         this.deptno=deptno;
17         this.name=name;
18         this.department=department;
19         System.out.println(deptno + " " +  name + " " +  department);
20     }
21
22
23 }
24 public class Employee{
25     public static void main(String[] args) {
26         AllStatic.displayonce(AllStatic.organization);
27         AllStatic as= new AllStatic();
28         as.displayWhenObjectiscalled(302,"Satya Prakash Das","Developing");
29         as.displayWhenObjectiscalled(303,"Debasish Patel","Developing");
30         as.displayWhenObjectiscalled(303,"Arpan Dutta","Developing");
31     }
32 }
```

Console ×

<terminated> Employee [Java Application] C:\Program Files\Java\jdk-1

```
These guys work in : MINDTREE MINDS
302 Satya Prakash Das Developing
303 Debasish Patel Developing
303 Arpan Dutta Developing
```
